CEIBA HONEY

Honduras • La Paz • Marcala

ABOUT THIS COFFEE

This coffee is grown in the Marcala region of Honduras. Organically grown, it is the fruit of the work of several partner producers of COMSA (Café Organico Marcala), with whom we have been working since 2018.
COMSA's approach is based on sustainability. The cooperative supports producers who want to set up organic farming, to make the transition from conventional farming to more environmentally friendly farming.
The producers who make up COMSA regularly receive courses in coffee tasting and farming. The cooperative also subsidises the education of children in the community in order to support future generations.
