

ABOUT THIS COFFEE

The Federación de Campesinos del Cauca – FCC, located in the Pubenza Valley, works to improve the living conditions of the peasant farmers of Cauca, promoting a dignified life, peacebuilding, the defense of rights, and the sustainable development of rural communities.

The project is also based on generational complementarity: valorizing the father's coffee while integrating the younger daughter into the production chain with an innovative approach. The cup quality is excellent, with coffees distinguished by a processing method different from conventional practices. The natural process also allows for the conservation of water resources.

Producer	FCC
Species	Arabica
Process	Natural
Drying	Drying beds
Altitude	1830
Harvest	May - July
Type of harvest	Manual
