

LA PRIMAVERA – WOMEN COFFEE

 Colombia • Quindio • Circasia

ABOUT THIS COFFEE

This coffee is the fruit of a family legacy that began with our grandfather, who dedicated himself to restoring balance to the land by replanting trees and practicing vermiculture. His vision helped create a thriving ecosystem, where rich biodiversity and unique microclimates contribute to the distinctive character of our coffees.

Today, the farm continues to honor his vision, combining a deep respect for nature with continuous innovation in coffee production.

Refined over the years, this coffee’s processing method has become a cornerstone of the farm’s portfolio. Despite its extended fermentation, it retains a remarkably delicate and refined character.

Each cup reflects generations of knowledge, a commitment to sustainability, and the harmony between family, coffee, and nature.
