

ABOUT THIS COFFEE

This coffee is a washed Castillo, oxidatively fermented for 18 hours at Hacienda Misiones, located in El Colegio, Cundinamarca.

What makes this coffee special is the human connection behind every step. A committed, united team brings it to life, people who not only work on this land, but live on it and care deeply for it. Their sense of purpose, pride, and constant pursuit of excellence are reflected in every cup, as recognized by the clients and visitors who've experienced it firsthand.

Our Castillo variety has earned recognition over time. Initially for being one of the largest plantations of its kind, with over 700 hectares under cultivation. Today, although the planted area has decreased, the coffee continues to stand out for its unique flavor profile, drawing attention from diverse and distant markets.
