SAN JOSE DE LA MAJADA

Valle de Oro is one of MAV Coffee's 3 farms. Here, nothing is left to chance, starting with the variety produced on the farm: Marsellea.

It was selected by Lean Coffee Management, which manages MAV's agricultural project, for its high resistance to rust, its robustness against the wind and rain that affect the region with increasing frequency, and its ability to produce quality and quantity at medium altitudes.

On the subject of inputs, the farm is pesticide-free. The coffee trees are protected by the grasses that grow naturally at their feet. These grasses feed the insects that would otherwise feed on the coffee leaves. This way, MAV also avoids using insecticides.
