

COFFEA DIVERSA DILLA ALGHE JAUNE

Guatemala • Suchitan

ABOUT THIS COFFEE

Originating from the botanical garden of Coffea Diversa, this lot highlights the Dilla Alghe Jaune variety, a rare Ethiopian wild variety with a singular genetic heritage.

Coffea Diversa is a pioneering project founded in the early 2000s by José Padilla and Gonzalo Hernández, with a radically different vision from traditional coffee cultivation. Conceived as a botanical coffee garden, the project aims to preserve, observe, and enhance the genetic diversity of coffee through the cultivation of hundreds of rare botanical varieties. Today, Coffea Diversa houses the world's largest private collection of botanical coffee varieties, with over 800 specimens, of which only a portion is currently produced as micro-lots.

The Dilla Alghe is an Ethiopian wild variety originating from the vicinity of the town of Dilla, in southwestern Ethiopia.

Producer	Coffea Diversa
Species	Arabica
Varieties	Dilla Alghe
