

COFFEA DIVERSA HARAR

Guatemala • Suchitan

ABOUT THIS COFFEE

Originating from the botanical garden of Coffea Diversa, this lot highlights the Harar Petit variety, a distinctive expression of an emblematic Ethiopian coffee.

Coffea Diversa is a pioneering project founded in the early 2000s by José Padilla and Gonzalo Hernández, driven by a radically different vision of traditional coffee farming. Designed as a coffee botanical garden, the project focuses on preserving, observing, and showcasing coffee's genetic diversity through the cultivation of hundreds of rare botanical varieties. Today, Coffea Diversa hosts the world's largest private collection of coffee botanical varieties, with more than 800 specimens, only a portion of which are currently produced as micro-lots.

The Harar variety is historically widespread in the Harar region, in north-eastern Ethiopia. It is known for the strength of its plants, naturally high yields, and recognized cup quality.

Producer	Coffea Diversa
Species	Arabica
Varieties	Harar
Process	Washed
