

ABOUT THIS COFFEE

Our LENCA coffee is produced by the COMSA cooperative (Cafe Organico Marcala SA). It is a varietal blend, made up of catuai, caturra, tipica, bourbon, pacas and IHCAFE 90.

COMSA's approach is based on sustainability. The cooperative supports producers who want to set up organic farming, to make the transition from conventional farming to more environmentally friendly farming.

The producers who make up COMSA regularly receive courses in coffee tasting and farming. The cooperative also subsidises the education of children in the community in order to support future generations.

Producer	COMSA
Species	Arabica
Varieties	Blend
Process	Washed
Drying	3 days mecanical dryer
Altitude	1200 - 1700
Harvest	December - March
Type of harvest	Manual
