SLN 9

ANAEROBIC FERMENTATION

GUNGEIRI — WOMEN COFFEE

SCAN THE QR CODE FOR MORE INFO ON [BELCO.FR](https://belco.fr)

Originating from Gungegiri Estate, one of the four farms of Sangameshwar Coffee Estates managed by Hamsini Appadurai, this lot of SLN9 showcases the expertise developed within the family farms of Karnataka. The harvest is carried out with high quality standards: each tree is picked in three successive passes to select only perfectly ripe cherries. Manually harvested, the cherries are then pulped, fermented, washed twice, and slowly sun-dried on African raised beds. This lot benefits from an anaerobic fermentation process, allowing precise control of the fermentation and contributing to the development of its aromatic profile.

Farm	Gungegiri
Producer	Sangameshwar Coffee Estates
Species	Arabica
Process	Anaerobic Fermentation
