LA MANOA

Nestled in the highlands of Planadas, Tolima, Finca La Manoa is a family-run farm where coffee is cultivated with deep respect for both tradition and nature. For generations, the family has preserved and passed down coffee-growing knowledge, combining inherited practices with a continuous pursuit of quality and varietal expression.

This Geisha is grown between 1,810 and 2,100 meters above sea level, where the farm's environmental conditions allow the variety to thrive and fully express its unique character. Careful manual harvesting focuses exclusively on ripe and overripe cherries, ensuring optimal fruit quality before processing begins.
