RED BOURBON

NATURAL

LA CUMBRE

Emilio has managed to further refine the results he seeks in the cup by isolating a plot at the highest point of his farm. We have fallen in love with the very fruity profile of this natural processed Red Bourbon!

Emilio and natural process

A great lover of fully washed coffee, Emilio reserves a part of his harvest for natural coffee, bringing to it a lot of requirement and expertise.

He will be delighted by a very clean natural coffee when it allows the sensory characteristics of the variety and the terroir to shine through before those linked to the process.
