

LOS NARANJOS BLEND

 Salvador • Sonsonate

ABOUT THIS COFFEE

Los Naranjos is a picturesque municipality located in the mountainous Apaneca-Illamatepec mountain range, on the border between Sonsonate and Ahuachapán department, El Salvador, at an altitude ranging between 1,000 and 2,050 meters above sea level. This municipality is part of the well-known Ruta de Las Flores, a tourist route that connects several municipalities in the western region of the country.

Years ago, these lands were dedicated almost exclusively to coffee production. However, coffee left behind more than just an economic legacy—it helped shape the development of the town. Many early coffee producers contributed to the community by donating land and resources for schools, churches, and other institutions that still serve the region today.

Los Naranjos blend is a coffee composed of three varieties: Bourbon, Pacas & Catimor. This coffee comes from Los Naranjos farm.

Species	Arabica
Process	Natural
