

ABOUT THIS COFFEE

The estate was founded in 1951 according to the Ethiopian calendar. It originally belonged to Mustafa Mohamed Ali's father, a recognized religious scholar (sheikh), trained in Islamic studies at Alexandria University in Egypt.

In 1987 (Ethiopian calendar), Mustafa took over the family farm after his return from Saudi Arabia, continuing the development of the estate with high standards and commitment.

Mohamed Ali is now a long-standing partner of Belco. A long-time partner, he offers us several coffees from this terroir, with a constant focus on quality. This lot is a Grade 1 natural, the highest Ethiopian classification, ensuring rigorous selection of cherries and great purity in the cup.

The dry mill specializes exclusively in the natural process. Harvest begins in October.

Producer	Mustafa Mohamed Ali
Species	Arabica
Varieties	Heirloom
Process	Natural
Drying	21 days drying beds
Altitude	1900 - 2000 ASL
Harvest	September - December
Type of harvest	Manual
