

# DAMBI UDDO GATAMA

 Ethiopia • Guji • Odo Shakiso

## ABOUT THIS COFFEE

The Dambi Uddo farm is divided into 4 plots. The natural coffee offered here comes from the Gatama plot, located at about 2100m. It takes its name from a tree in the Dambi Uddo forest whose flowers are known to produce a tasty white honey. The Gatama plot covers 9 hectares. This coffee is organically grown and harvested by hand in a rich forest, which gives it its unique characteristics. It is distinguished by sweet and fruity notes. As a result of increasing awareness of this forest coffee, Belco hopes to preserve the exceptional Dambi Uddo environment and its unique farming practices.
