

HAMSINI APPADURAI – NATURAL

 India • Karnataka • Chikmagalur

ABOUT THIS COFFEE

Cultivated on the Attikan Farm, in the heart of the Biligiri Rangan Hills, this Arabica SLN 9 exemplifies the work carried out by Hamsini Appadurai and the Sangameshwar Coffee Estates teams on controlled fermentations. After selective harvesting and sorting by density, the coffee cherries are fermented for 32 hours in barrels with a homemade rice water culture, then dried under shade on African raised beds for fifteen days. This preparation reveals an aromatic profile characterized by notes of orange, lemon, mandarin, and grape, supported by hints of sweet lime and caramel.

Farm	Attikan
Producer	Sangameshwar Coffee Estates
Species	Arabica
Varieties	Catimor, SLN 9
Process	Natural
