ABOUT THIS COFFEE

Finca Santa Teresa is part of the Consorcio Social del Café Mexicano and has established itself as a production unit focused on quality, sustainability, and continuous improvement. Its location in the buffer zones of the El Triunfo Biosphere Reserve offers privileged climatic conditions, fundamental for the production of high-altitude coffees with complex and balanced profiles.

The Farm spans 300 hectares, more than half of which is entirely dedicated to natural conservation — a balance between production and preservation that reflects a long-term vision where coffee quality is inseparable from the health of surrounding ecosystems.

What makes Santa Teresa unique is its integration of technological innovation and environmental management within a coherent production model.
