

SNOW COOPERATIVE

Ouganda • Rwenzori • Bunyangabu

ABOUT THIS COFFEE

This SL28 Arabica is grown and processed by members of Rwenzori Snow Cooperative in Kyamabwe Parish, on the slopes of the Rwenzori Mountains in western Uganda. The cooperative was founded in 2023 by three farmers—Muhindo, Kisebo, and Mugume—after recognizing that farmers selling individually were receiving low prices, had limited market access, and struggled to maintain consistent quality.

Muhindo had previously received training in specialty coffee production, bringing valuable technical knowledge to the group and helping guide the cooperative's commitment to quality and continuous learning.

To support its members, the cooperative has established a coffee and tree nursery to support farmers improve their productivity and promote long-term sustainability. It also mobilizes and trains farmers in good agronomic practices and post-harvest handling.

Producer	Rwenzori Snow Cooperative
Species	Arabica
Varieties	SL 28
Process	Natural
Drying	Drying beds
Altitude	1700 - 2000 masl
