SL 28

KENYAN WASHED

ORETI — AB — SL28

SL28 is the variety that built Kenya's reputation in specialty coffee.

Oreti Estate is one of the few remaining producers of SL28, with old trees planted on these plots that Boyce Harries carefully preserves. This AB grade (screen size 16/17) lot offers the legendary SL28 experience in a dense, concentrated bean format.

The washed process—hand-picking, pulping, fermentation, rinsing, and sun-drying on raised beds—is carefully managed by Boyce's 30-year-experienced wet mill manager and his team of 40 permanent employees . During peak harvest, up to 300 seasonal workers join to ensure timely and efficient processing .
