# SANTA MARIA FARM

Finca Santa Maria is located in the Buesaco area of the department of Nariño. Located at an altitude of between 1800 and 2200 meters above sea level, in a mountainous area on the border with Ecuador, the coffee is cultivated with large temperature differences that make the production unique.

Armando Benavides has owned this 8-hectare farm for over 30 years. He promotes sustainable agricultural practices: polyculture, agroforestry, composting, and working the land to reduce the use of chemical inputs.
