ALAKA

Ethiopia • Guji • Hambella

ABOUT THIS COFFEE

Aman Adinew founded Metad in 2010, and coffee production began three years later. His brother, Tariku Adinew, joined the company shortly afterward. In Hambela, Metad owns a 200-hectare farm located in the Hambela Wamenna woreda, specifically in the Alaka and Bishan Fugu kebeles.

This Guji forest coffee is offered by Metad. Committed to restoring the full value and recognition of this type of production, they promote from the village of Bishan Fugu a carefully traced, hand-harvested forest coffee, known for its distinctive fruity profile.

The farming system used on these plots follows Ethiopia's well-known semi-forest model. The landscape is rich in natural forest, with native climax tree species still present, such as qararo (Aningeria adolfi-friederici). The farm is organized into plots, and each plot is planted with a single coffee variety. The varieties grown include: 75227, 74112, 74110, and 74140. The farm is organically managed, with all coffee cherries harvested by hand.

Farm	**Alaka**
Producer	**METAD AGRICULTURAL DEVELOPMENT PLC**
Species	**Arabica**
Varieties	**74110, 74112, 74140, 75227, Heirloom**
Process	**Washed**
Drying	**Drying beds**
Altitude	**2100 - 2200**
Harvest	**December - February**
Type of harvest	**Manual**
