

ABOUT THIS COFFEE

Our LENCA coffee is produced by the COMSA cooperative (Cafe Organico Marcala SA). It is a varietal blend, made up of catuai, caturra, tipica, bourbon, pacas and IHCAFE 90.

COMSA's approach is based on sustainability. The cooperative supports growers who want to switch from conventional to organic farming, in order to make the transition to a more environmentally-friendly form of agriculture.

The producers who make up COMSA regularly receive courses in coffee tasting and farming. The cooperative also subsidises the education of children in the community in order to support future generations.

Species	Arabica
Varieties	Blend
Process	Washed
Drying	Guardiolas
Altitude	1200 - 1700
Harvest	December - March
Type of harvest	Manual
