

ABOUT THIS COFFEE

Carried by Belco for nearly eight years, Mombacho is one of the signature coffees from our partnership with Olman Valladarez, a key producer in Nueva Segovia. After taking over the family farm, Olman structured his project around a progressive mastery of quality and the entire value chain. He notably invested in his own infrastructure, including the construction of a wet and dry mill, allowing him to ensure precise control over processes and great consistency in cup profiles, year after year.

Olman offers both volume coffees and specialty lots, capable of excelling at high standards, up to Cup of Excellence selections. This approach combines consistency and high standards.

Originating from the village of Dipilto, Mombacho is crafted from cherries harvested across all of Olman's farms, supplemented by those from neighboring producers with whom he collaborates closely. All plots are managed using agroforestry, respecting natural balances and local terroirs.

A reliable, well-structured, and consistent coffee that reflects the expertise of a committed producer and the strength of a long-standing partnership.

Producer	Olman Valladarez
Species	Arabica
Varieties	Blend
Process	Washed
Drying	Patios
Altitude	1500 - 1600
Harvest	December - March
