BIRABWINE KWIHETERA
BURI NI NGEMBWA KU
UTUYIRA

Founded in 2004 in Musasa, at an altitude of over 2,000 metres, it brings together over 1,100 farmers. The cooperative is located just 50 km north of Kigali as the crow flies, but after more than 2? hours on winding tracks.

At this cooperative, the water used to wash the coffee is reused. The cooperative encourages farmers to reforest their plots and plant shade trees. When a farmer leaves the cooperative with a coffee plant, he also gets a shade tree.

The cooperative has also set up a system of financial aid with the creation of a "Farmers saving account": the possibility of taking out a small low-interest loan with the cooperative.
