SUNRISE — AA

Kenya • Trans-Nzoia • Mt Cherangani

ABOUT THIS COFFEE

At 1,800 meters, on volcanic soil cooled by mountain mist over Mt. Elgon, AA-grade beans—the largest screen size Kenya produces—are handpicked at peak ripeness.
Sunrise, a washed Kenya coffee that delivers everything the country is famous for: blackcurrant brightness, citrus snap, and a finish that lingers like dawn.
AA means screen size 18+—the biggest, most developed beans from the harvest. They spend longer on the tree, absorb more volcanic minerals, and cup with more complexity.

Species	**Arabica**
Varieties	**Batian**
Process	**Washed**
Drying	**10 days drying beds**
Harvest	**November - January**
Type of harvest	**Manual**

The washed process here follows Kenya's legendary tradition:

* Handsorted cherries
* Pulped within hours of harvest
* Fermented overnight in clean water
* Washed thoroughly in spring-fed channels
* Dried slowly on raised beds for 14+ days
