CATIMOR

SLN 9

WASHED

GUNGEIRI

Produced on Gungegiri Farm, in the heart of Karnataka's Western Ghats, this Arabica SLN 9 comes from Sangameshwar Coffee Estates, the group of farms managed by Hamsini Appadurai. The coffee cherries are hand-picked at peak ripeness between 1,370 and 1,420 meters above sea level before undergoing a washed process characterized by a double fermentation. A first fermentation phase is carried out on the cherries before pulping, then the coffee is fermented a second time after pulping, for a total duration of 34 hours. After washing, the coffee is slowly dried for twelve days on African raised beds to promote uniform airflow and consistent drying.
