

RADIOPHARE — HONEY

 Indonesia • Java • Sunda

ABOUT THIS COFFEE

From the Puntang area of Sunda in West Java, this coffee is a blend of typica, Line S and catimor.

This coffee is produced exclusively under the shade of woody trees of various species (pine, eucalyptus, erythrine, avocado). The coffee is prepared in the honey process by the Klasik Beans cooperative, which also works on the islands of Bali, Java, Sunda, Flores and Sulawesi.

Founded in 2008 by a group of producers in Puntang, the Klasik Beans cooperative has a philosophy that complements that of Belco, in terms of quality, people and respect for the environment.

Between high altitude forest and rice fields, the plantations stretch over the Guntur, Halimu Tilu and Puntang volcanoes. At each harvest, the coffee cherries are picked by hand and taken to one of the cooperative's 3 cherry processing sites (Pacet, Ciwidey or Garut).

Farm	Radiophare
Producer	Klasik Beans
Species	Arabica
Varieties	Typica, Catimor, Line S
Process	Honey
Drying	Drying beds
Altitude	1200 - 1500
Harvest	May - September
Type of harvest	Manual
