WASHED

# TABA COFFEE VILLAGE

Coffee Village is driven by a philosophy based on three key areas: Quality, environment & community.

**QUALITY:** Selective harvesting, traceability and process control

Coffee Village grows only the traditional bourbon variety.

**Traceability:** During harvesting and processing, the coffee from each plot is isolated to ensure maximum traceability. The result is reflected in the cup as each micro-lot reflects the unique characteristics of its plot (soil, shade, sunlight, etc.).

**Harvesting:** selective and manual, only cherries that have reached perfect maturity are picked.
