SANTA ISABEL

All coffees produced at Finca Santa Isabel are grown in the dense shade of a highly protected ecosystem.

Guided by his principles to preserve the environment, Alex began to explore biodynamic practices to improve the health and quality of his coffees.

The result is a cascara of excellent quality, certified organic. It is during the pulping process that cascara is obtained, which is then dried on African beds.

Here is the translation:

Sterilized in November 2024, it is best to consume it within 18 months, by May 2026.
