

ABOUT THIS COFFEE

Walter Peters' cascara is made from organic coffee produced according to biodynamic principles on his farm, Finca Irlanda. This cascara is made from washed process coffee.

Most of the varieties used are resistant to coffee rust, related to the Catimor type. The cherry pulp was recovered from the best cherries of the harvest.

Walter Peters is one of the pioneers of biodynamic coffee growing in Mexico. While coffee pulp was originally used as fertilizer on the farm, Finca Ireland's production of cascara as a coffee co-product dates back to 2020.

Farm	Finca Irlanda
Producer	Walter Peters
Species	Arabica
Process	Washed
Drying	Mecanical dryer
Altitude	1090
Harvest	February - May
Type of harvest	Manual
